-16-

~~A method for treatment of Pythiosis in human~~
patients having the Pythiosis which comprises:

(a) providing a vaccine containing a mixture
of mixed intracellular proteins and mixed extracellular
5 proteins of *Pythium insidiosum* in a sterile aqueous
solution, wherein the mixed intracellular proteins,
which consist essentially of proteins removed from
disrupted cells of the *Pythium insidiosum* grown in a
culture medium, and the mixed extracellular proteins,
10 which consist essentially of proteins removed from the
culture medium for growing the *Pythium insidiosum*, are
in water and the mixture has been dialyzed to remove low
molecular weight components less than 10,000 MW; and

(b) vaccinating the patient with the vaccine.

-17-

The method of Claim 16 wherein vaccinating the
patient with the vaccine is subcutaneous.
